

Confirmation of Polish Perfins Needed for *The World Perfin Catalog*

Bob Schwerdt (#505)
Foreign Catalog Editor

Twelve years ago, the Perfins Club published a request for members to check their Polish perfins for inclusion on a worksheet. Now, we would like to confirm some items of doubtful-probabilities before including them in the European Section of *The World Perfin Catalog*.

At present, we have received confirmation for one perfin type on a Cracow local, four types on Northern Poland stamps, four types on Southern Poland stamps, and fifty-nine types on Polish General issues.

The following types were gleaned from various lists, articles, etc. However, because of translation difficulties, they may not appear on Polish stamps, per se. No doubt some (as indicated) appear on perfined stamps of other countries with Polish cancels.

We are trying to determine if any actually appear on Polish stamps. You can help in this confirmation process by sending photocopies of the front and back of any items on this list that you have on stamps of Poland.
